Class 1 Modification – Closure Plan Revision to Update Containment Building Closure Schedule

Dear Ms. Creed:

Attached is a *Notice of Class 1 Modification* to USEI's Part B Permit. This notice is being filed in accordance with IDAPA 58.01.05.012 (40 CFR §270.42). The mailing list used is on file with the State of Idaho as the official mailing list.

The attached notification details the requirements for this modification and the effective date. In addition, the proof of mailing (certified mail summary) will be forwarded as proof that the required mailing was completed in accordance with 40 CFR Part §270.42(a)(ii) following approval of the modification from the Director.

The purpose of this modification is to update the Closure Plan Attachment 9 of USEI's RCRA Part B Permit, to reflect the current condition of the Containment Building and to update the time of closure for the building, since it will be closed before the facility undergoes substantial closure activities, as described in the current version of Attachment 9. Partial closure of the Containment Building prior to the period when the facility will undergo substantial closure activities is needed due to damage sustained during the November 17, 2018 Incident.

All other required information is included in the attached documents including the required certification statement and the applicable revised permit pages for review.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to be the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
